SUMMARY

Builder-operator with 12+ years across regulated financial services and software. Founded and run an IRS-authorized tax practice — 500+ clients served, six-figure annual revenue, team of six — and design, ship, and operate production software end to end: a live compliance SaaS, subscription products with Stripe billing, and self-hosted multi-agent AI systems. I own problems from intake through build, deployment, support, security, and compliance.

TECHNICAL SKILLS

Languages	TypeScript/JavaScript (Node), Python, SQL, Bash/PowerShell
Web & Infra	Next.js, React, Supabase/Postgres, Stripe, Docker, GitHub Actions (CI/CD), Cloudflare, Vercel, Railway, DigitalOcean, Tailscale
AI Systems	Anthropic & Gemini APIs, multi-agent orchestration, MCP server development, local models (Ollama), multi-provider fallback design, Playwright automation
Security	WISP authorship (IRS Pub 4557 / FTC Safeguards Rule), PII isolation architecture, access control, secure client-data handling

SELECTED PRODUCTION WORK (live or public)

- TraceReady** — traceready.online
Live EUDR supply-chain compliance SaaS: due-diligence workflows, traceability, regulated document management. Stripe billing, Cloudflare deployment.
- SuiteScape** — app.suitescape.com
Subscription web-intelligence SaaS: Next.js/TypeScript, Stripe webhook-driven entitlements, four-provider AI fallback so extraction degrades gracefully across model outages.
- Trident Protocol** — github.com/imperator-clawdius/trident-protocol
Self-hosted four-agent AI orchestration network across two hosts with shared memory, MCP servers, and an autonomous watchdog — in continuous production since early 2026.
- Argos Vendor Command** — github.com/imperator-clawdius/argos-vendor-command
Multi-agent vendor-risk workflow: schema-driven records, weighted nine-domain risk policy, seven-state machine, secret-scanning CI.
- Additional shipped work: NoticeOps (IRS-notice drafting SaaS — Next.js/Supabase/Stripe), Daybreak (paid Windows productivity app), BurnWatch (satellite-data-to-outreach pipeline), Backstop Proof (chargeback evidence infrastructure).

EXPERIENCE

- Founder / Operator — True Tax Strategies LLC** 2016 – Present
Orlando, FL · founded 2016 as True Tax Services LLC
- Built an IRS-authorized tax practice to sustained six-figure annual revenue, self-funded after repaying a \$30K startup loan in year one; 500+ clients served (~73 active) with a team of six and a GM running daily operations.
 - Sole technology and security operator: authored and enforce the firm's Written Information Security Program (IRS Pub 4557, FTC Safeguards Rule, FL §501.171); cleared an IRS Return Preparer Office review with a full compliance package.
 - Automated firm operations end to end: AI-assisted intake and outreach, upfront invoicing, documented due-diligence systems; front-line client support under hard federal deadlines.
- Independent Product Developer** 2024 – Present
- Designed, shipped, and operate the portfolio above solo — deployment, billing, customer support, monitoring, and incident response for live products.
- Founder / Operator — Passive Print Labs LLC & Fire Blast Collectibles LLC** 2022 – Present
- 3D-printing fabrication fleet (hardware assembly, calibration, networked print management) and collectibles commerce: sourcing, authentication, QC, fulfillment, customer resolution.
- Sales Team Manager — Technical Support Sales Organization** 2013 – 2014
- Managed a high-performance team generating ~\$1M/month in consumer technical-support sales; hiring, training, escalations, and daily floor operations.

CREDENTIALS & EDUCATION

- University of Central Florida — Cybersecurity Bootcamp Certificate · CompTIA Security+ (in progress)
- IRS EFIN & PTIN holder (federal suitability check passed) · Florida 2-15 Life & Health Insurance License
